Summary

Aspiring **Java Developer, Full Stack Developer, Data Analyst, and AI/ML Engineer** skilled in Java, Spring Boot, REST APIs, SQL, Python, React, Node.js, Machine Learning, and Power BI. Experienced in backend development, full-stack applications, model training, data visualization, and deployed AI-powered systems. Seeking roles in **Java Development, Full Stack Development, Software Engineering, Data Analytics, and AI/ML Engineering**.

Education

B.E. Information Science and Engineering Presidency University, Bengaluru	2023–2026 CGPA: 6.89
Diploma in Civil Engineering CIT Tumakuru	2019–2022 64.4%
SSLC (10th Standard) Shubhodaya English Medium School, Gubbi	2018–2019 85.12%

Projects

Diabetes Prediction App (Python, ML, Streamlit) — Live on Streamlit 2025

- Developed ML models using Logistic Regression & Random Forest for medical prediction.
- Applied data preprocessing, scaling, evaluation metrics, and exploratory analysis.
- Built and deployed a live Streamlit web application for real-time diabetes prediction.

AISTYLO – AI-Powered E-Commerce Platform (Full Stack + AI) — Deployed 2025

- Built a full-stack e-commerce platform using React, Node.js, Express, FastAPI, and MySQL.
- Implemented AI product recommendations, CNN-based image search, and a GenAI chatbot (Gemini API).
- Developed admin dashboard, product filters, ratings, coupons, and order tracking modules.
- Deployed across Netlify, Render, Railway, and Clever-Cloud for scalable access.

Car Sales Analysis Dashboard (Power BI, SQL, Excel) — Published on Power BI Service 2025

- Analyzed sales KPIs, trends, revenue metrics using SQL, Excel, and Power BI.
- Performed data cleaning, transformation, and KPI-based reporting.
- Published an interactive dashboard on Power BI Service for business insights.

Skills

Backend Development: Java, Spring Boot, REST APIs, MySQL, JDBC, OOP, Collections Framework

Frontend: HTML, CSS, JavaScript, React, Bootstrap

Programming: Java, Python, SQL, JavaScript

Data Analytics: Power BI, Tableau, Excel, KPI Reporting, Data Cleaning, Data Visualization

Machine Learning: Pandas, NumPy, Scikit-learn, EDA, Feature Engineering, Model Training

Developer Tools: Git, GitHub, IntelliJ, VS Code, Postman, Jupyter Notebook

Languages: Kannada, English

Certifications

- Tata Data Analytics Job Simulation — Forage
- Microsoft Excel — Coursera
- Python Beginner — Simplilearn
- SQL (Basic) — HackerRank
- Data Analytics — Simplilearn
